Language: English . Brand New Book ***** Print on Demand *****. Hospitals and the healthcare community as a whole have become the most common and lucrative target for cyber-attack. Many breaches are targeted and sophisticated while others are surprisingly random and simple. The Internet of Things has increased the attack surface with a host of new vulnerabilities and an alarming number of organizations lack even the most basic cybersecurity hygiene, yet everyone is surprised when there is a breach and sensitive information is exfiltrated. Bad actors come in all forms with a multitude of methods, motivations and exploits but virtually all of them start with a phishing attack. All it takes is one click on a malicious link and an entire organization can be infected. The initial goal of a hacker is to obtain legitimate admin credentials then move laterally throughout a network escalating the level of privileges for access. Exfiltration of sensitive information and injecting falsified content are easy with the right access. Strangely, the health sector as a whole offers virtually zero training on social engineering or even basic standards for a cybersecurity-centric organizational...
