(ID-16-48B) and ID-16-49A. 2. 560 acres state; 240 acres private between WSAs OR-3-195 (ID-16-48B), ID-16-48C and ID-16-53(NV-010-103A). 3. 360 acres private between ID-16-49A, 16-49D and 111(16)-49E. GEOLOGY; MINERALS AND ENERGY 1. Geology The WSAs lie within a geological region known as the Owyhee Uplands which encompass southeast Oregon, southwest Idaho and northernmost Nevada. These uplands originated from basalt rhyolite volcanism during the Miocene Epoch (Tertiary Period) between six and twenty-two million years ago. The southern portion of the Owyhee Uplands through which the Owyhee River has carved its canyons is characterized by an extensive flat lying basalt plain stretching from the Bull Run Mountains of Nevada to the Santa Rosa Mountains of Oregon. The plain contains numerous basalt capped mesas, tables, buttes, canyon rims, and valleys. This basalt cap consists of many thin flows of fine-grained, vesicular alkaline-olivine basalt and interbedded sedimentary units. The sedimentary units contain basalt clasts, tuffaceous sands and...

Reviews

Complete guideline! Its this type of great read through. it absolutely was writtern quite perfectly and helpful. I am very happy to explain how this is basically the best book i actually have read through during my personal life and can be he very best book for at any time.

-- **Joshua Gerhold PhD**

A very awesome book with perfect and lucid reasons. It really is basic but shocks within the 50 percent of the book. Its been designed in an exceptionally easy way and is particularly merely right after i finished reading this ebook where in fact changed me, change the way i think.
